2: Invitation Maker (Admin Panel)

The admin panel is developed to add new categories, templates, stickers in the invitation card application so user can get new updated data before any new update also admin can handle the order of categories, their visibility status and also admin can handle the Google ads through this admin same goes for templates.

Application is not published on Plays Store

3: PDF Viewer and Editor

Build an Application in which users can read their PDF files and also can use multiple tools related to PDF files like the following:

- | | |
|----------------|--------------------------------|
| 1: Lock/Unlock | 5: State Management (Provider) |
| 2: Split/Merge | 6: Implemented Google Ads |
| 3: Compress | 7: Firestore for Ads handling |
| 4: PDF Editor | |

Application Link:

<https://play.google.com/store/apps/details?id=com.pdf.reader.viewer.converter.document.pdfviewer>

4: AR Drawing

In this application user can trace and make sketches of provided images also user can convert their images into pencil sketch and save them into gallery as an image.

- Image tracing through Camera
- Image to Sketch Conversion
- Implemented Google Ads through Firestore.
- Applied GetX.

Application is yet to be published

5: Naveen Boutique (E-Commerce Store)

This application was the internship task to develop an e-commerce store by using word press Rest-API. Designed UI on Figma and integrated word press API.

Application is not published on Plays Store

Skills & abilities

- Flutter / Dart
- Google Ads Integration
- State management (Provider , Get X)
- API Integration
- Responsive UI
